Removable Partial Dentures. Removable partial dentures are removable dental prostheses. If you still have some natural teeth in your mouth, your dentist will likely recommend removable partial dentures. There are three types of removable partials, including:

1. Cast metal partial denture. A cast metal framework partial is the most common type

Clinical guide - media.resmed.com When a fracture is undisplaced or minimally displaced, reduction may not be necessary. However, the majority of fractures and epiphyseal injuries are painful and immobilisation is often the best analgesic. Removable forearm splints are ideal as primary management for undisplaced fractures of the distal radius (Figure 34).
