Coronary artery disease - Wikipedia

Although the relevance of these findings for the risk for coronary heart disease is less clear than with confirmed coronary risk factors, such as HDL-C or fibrinogen, alcohol’s effects on platelet activity could represent an important mechanism through which alcohol could prevent cardiovascular disease.

Ischemic Heart Disease - an overview | ScienceDirect Topics

Introduction and definitions. Cardiovascular disease (CVD) is a group of diseases that include both the heart and blood vessels (), thereby including coronary heart disease (CHD) and coronary artery disease (CAD), and acute coronary syndrome (ACS) among several other conditions. Although health professionals frequently use both terms CAD and ACS …

Pathology Outlines - Atherosclerotic coronary artery disease

Coronary artery disease (CAD), also called coronary heart disease (CHD), ischemic heart disease (IHD), or simply heart disease, involves the reduction of blood flow to the heart muscle due to build-up of plaque (atherosclerosis) in the arteries of the heart. It is the most common of the cardiovascular diseases. Types include stable angina, unstable angina, myocardial …

How to Reverse Heart Disease with the Coronary Calcium

Although initially focusing on ischemic heart disease, Dr. Meadors set the tone for the next 65 years by proposing “to study the expression of coronary artery disease in a ‘normal’ or unselected population and to determine the factors predisposing to the development of the disease through clinical and laboratory exam and long term follow-up…” 12 The initial budget …

What does my patient’s coronary artery calcium score mean

Slovakia ranked first for heart disease deaths amongst European Union in 1998. All of the top 5 countries by heart disease deaths are Cold countries’. All of the top 4 countries by heart disease deaths are European. 12 of the bottom 13 countries by heart disease deaths are NATO. France ranked last for heart disease deaths amongst Eurozone in 1998.

Definitions and Epidemiology of Coronary Functional Epidemiology. Coronary heart disease is
now the leading cause of death worldwide. An estimated 3.8 million men and 3.4 million women die each year from CHD 1. In developed countries heart disease is the leading cause of death in men and women 2.

Framingham Risk Score for Hard Coronary Heart Disease – … 19-11-2021 · The associations with coronary heart disease (CHD) of substituting 5% energy intake from dietary fatty acids (total and classes) for 5% energy from carbohydrates in the EPIC?CVD (European Prospective Investigation into Cancer and Nutrition–Cardiovascular Disease) study.

Stable ischaemic heart disease – Symptoms, diagnosis and 01-08-2010 · Coronary heart disease (CHD), the leading cause of mortality in the United States, is responsible for one out of every five deaths.1 Treatment of cardiovascular risk factors has resulted in a 50

The Blood Triglyceride:HDL Ratio and LDL Particle Size MDCalc uses the 'Hard' coronary Framingham outcomes model, which is intended for use in non-diabetic patients age 30–79 years with no prior history of coronary heart disease or intermittent claudication, as it is the most widely applicable to patients without previous cardiac events.

The Framingham Heart Study and the Epidemiology of Background The influence of social relationships on morbidity is widely accepted, but the size of the risk to cardiovascular health is unclear. Objective We undertook a systematic review and meta-analysis to investigate the association between loneliness or social isolation and incident coronary heart disease (CHD) and stroke. Methods Sixteen electronic databases were ...

Alcohol's Effects on the Risk for Coronary Heart Disease 07-12-2021 · Various pathomechanisms may be responsible for this emergent clinical scenario, including - but not limited to - pericarditis, myocarditis, takotsubo syndrome, plaque erosion, spontaneous coronary dissection, valvular heart disease, systemic diseases and functional coronary disorders. 35 The prevalence of coronary artery spasm is high in this patient ...

Coronary Heart Disease | NHLBI, NIH Coronary heart disease (CHD) is the most common cause of death in both developing and developed countries. According to the World Health Organization (WHO), an estimated 3 802 000 men and 3 406 000 women died of CHD worldwide in 2004 (World Health Organization, 2004).Thus, approximately 13% of all deaths were caused by CHD.

Dietary Fatty Acids, Macronutrient Substitutions, Food 28-06-2005 · The Heart Protection Study (HPS) showed unambiguous benefit of statin administration in individuals aged 40 to 80 years with total cholesterol >135 mg/dL and at risk because of a previous MI or other coronary or noncoronary artery occlusive disease, diabetes mellitus, or treated hypertension. 19 The Physicians’ Health Study (PHS) showed that aspirin ...

Coronary heart disease | Health Knowledge Pulmonary heart disease, also known as cor pulmonale, is the enlargement and failure of the right ventricle of the heart as a response to increased vascular resistance (such as from pulmonic stenosis) or high blood pressure in the lungs.. Chronic pulmonary heart disease usually results in right ventricular hypertrophy (RVH), whereas acute pulmonary heart disease usually ...

Coronary Heart Disease Risk | Calculators | Medical 30-11-2021 · Ischaemic heart disease, an inability to provide adequate blood supply to the myocardium, is primarily caused by atherosclerosis of the epicardial coronary arteries. For this reason the terms ischaemic heart disease, chronic coronary syndrome, coronary heart disease, and coronary artery disease are often used interchangeably, although the true ...

Trends in the epidemiology of cardiovascular disease in 02-07-2013 · The Coronary Calcium Score is a precise quantitative tool for measuring and tracking heart disease risk, and is more valuable and accurate than other traditional markers, such as total cholesterol, which is practically worthless as a predictor of heart disease risk.

Loneliness and social isolation as risk factors – Heart Heart disease was an uncommon cause of death in the US at the beginning of the 20th century. By mid-century it had become the commonest cause. After peaking in the mid-1960s, the number of heart disease deaths began a marked decline that has persisted to the present. The increase in heart disease de ...

Pathophysiology of Coronary Artery Disease | Circulation 24-08-2004 · The coronary artery calcium (CAC) score is an independent predictor of coronary heart disease. We sought to combine information from the CAC score with information from conventional cardiac risk factors to produce post-test risk estimates, and to determine whether the score may add
clinically useful information. We measured the independent cross-sectional ... 

Epidemiology of coronary heart disease and acute coronary Mechanisms of SARS-CoV-2-induced myocardial injury remain elusive but may relate, in part, to direct SARS-CoV-2 effects on cardiac myocytes, or through up-regulation of ACE2 in the heart and coronary vessels. Respiratory failure and hypoxia in COVID-19 may also cause damage to the myocardium and immune mechanisms of myocardial inflammation may be ... 

Global Risk of Coronary Heart Disease: Assessment and More than six decades of empirical research have shown that psychosocial risk factors like low socio-economic status, lack of social support, stress at work and family life, depression, anxiety, and hostility contribute both to the risk of developing coronary heart disease (CHD) and the worsening of clinical course and prognosis in patients with CHD. 

The epidemic of the 20(th) century: coronary heart disease 30-12-2021 · Introduction. In 2014, cardiovascular disease (CVD) was the second main cause of death in the UK. The Global Burden of Disease (GBD) study has shown that the burden of CVD is declining in the UK; between 1990 and 2013 CVD death rates in England declined by 52%, coronary heart disease (CHD) by 60%, and stroke by 46%. The GBD study compares ... 

Pulmonary heart disease - Wikipedia 15-09-2018 · Coronary heart disease is a type of heart disease that happens when the arteries of the heart cannot deliver enough oxygen-rich blood to the heart. Learn about causes and symptoms of coronary heart disease, how it is treated, and NHLBI research.
