Carlow Folk Tales

Finding Charity's Folk highlights the experiences of enslaved Maryland women who negotiated for their own freedom, many of whom have been largely lost to historical records. Based on more than fifteen hundred manumission records and numerous manuscript documents from a diversity of archives, Jessica Millward skillfully brings together
African American social and gender history to provide a new means of using biography as a historical genre. Millward opens with a striking discussion about how researching the life of a single enslaved woman, Charity Folks, transforms our understanding of slavery and freedom in Revolutionary America. For African American women such as Folks, freedom, like enslavement, was tied to a bondwoman's reproductive capacities. Their offspring were used to perpetuate the slave economy. Finding loopholes in the law meant that enslaved women could give birth to and raise free children. For Millward, Folks demonstrates the fluidity of the boundaries between slavery and freedom, which was due largely to the gendered space occupied by enslaved women. The gendering of freedom influenced notions of liberty, equality, and race in what became the new nation and had profound implications for African American women’s future interactions with the state.

Tuscan Folk-Lore and Sketches

Drawing on the natural folk art tendencies of children, who love to collect buttons, bottle caps, shells, and Popsicle sticks to create beautiful, imperfect art, this activity guide teaches kids about the history of this organic art and offers inspiration for them to create their own masterpieces. The full breadth of American folk art is surveyed, including painting, sculpture, decorative arts, and textiles from the 17th century through today. Making bubblegum wrapper chains, rag dolls, bottle cap sculptures, decoupage boxes, and folk paintings are just a few of the activities designed to bring out the artist in every child. Along the way kids learn about the lives of Americans throughout history and their casual relationships to everyday art as they cut stencils, sew needlepoint samplers, draw calligraphy birds, and design quilts. Important folk artists such as the last surviving Shakers, the legendary Grandma Moses, and the Reverend Howard Finster are also explored in sidebars throughout the book.

The Souls of Black Folk

The 48 Folk-Tales in this book hail from the South East Asian land-locked country of Laos. Herein are stories like The Enchanted Mountain, The Spirit-Guarded Cave, The Monkeys and the Crabs, The Origin of Lightning (a tale which seems to be endemic amongst all the world's cultures,) The Faithful Husband, The Cheating Priest and many more children's stories which cover Romance and Tragedy, Temples and Priests, Moderation and Greed, Parables and Proverbs and The Wonders of Wisdom. There is also a small collection of Stories which went Astray. When these were first gathered by Katherine Neville Fleson, the country was a part of the kingdom of Siam, and are uniquely South East Asian in their charm and complete novelty. Until the translator of this volume collected these stories, they were even unwritten, with a single exception which was found in an ancient Laos manuscript. They are, and have been, orally preserved in the provinces which constitute the Laos country, just as they have been handed down from generation to generation, with slight variations in words or incidents. In older times, village elders would tell the stories at their merrymakings around the camp-fires and within their primitive houses, to amuse and instruct the youth and children. However, with the advent of the electronic age, this tradition is being lost, and the more the pity for it. To the Scholar, who is a student of the world's Folk-Lore, you may be assured that you have here a small window in history with the tales of Laos, unobscured, just as they were told when this volume was published in 1899.

Quicklet On W.E.B. Du Bois's The Souls Of Black Folk (CliffsNotes-like Book Summary)

A folk-taxonomy is a semantic field that represents the particular way in which a language imposes structure and order upon the myriad impressions of human experience and perception. Thus, for example, the experience of color in modern English is structured around an inventory of twelve "basic" color terms; but languages vary in the number of
basic color terms used, from thirteen or fourteen terms to as few as two or three. Anthropological linguists have been interested in the comparative study of folk-taxonomies across contemporary languages, and in their studies they have sometimes proposed evolutionary models for the development and elaboration of these taxonomies. The evolutionary models have implications for historical linguistics, but there have been very few studies of the historical development of a folk-taxonomy within a language or within a language family. Folk-Taxonomies in Early English undertakes this task for English, and to some extent for the Germanic and Indo-European language families. The semantic fields studied are basic color terms, seasons of the year, geometric shapes, the five senses, the folk-psychology of mind and soul, and basic plant and animal life-forms. Anderson’s emphasis is on folk-taxonomies in Old and Middle English, and also on the implications of semantic analysis for our reading of early English literary texts.

**You're It! Tag, Red Rover, and Other Folk Games**
Turbo-folk music is the most controversial form of popular culture in the new states of former Yugoslavia. Theoretically ambitious and innovative, this book is a new account of popular music that has been at the centre of national, political and cultural debates for over two decades. Beginning with 1970s Socialist Yugoslavia, Uroš Čvoro explores the cultural and political paradoxes of turbo-folk: described as 'backward' music, whose misogynist and Serb nationalist iconography represents a threat to cosmopolitanism, turbo-folk’s iconography is also perceived as a 'genuinely Balkan' form of resistance to the threat of neo-liberalism. Taking as its starting point turbo-folk’s popularity across national borders, Čvoro analyses key songs and performers in Serbia, Slovenia and Croatia. The book also examines the effects of turbo on the broader cultural sphere - including art, film, sculpture and architecture - twenty years after its inception and popularization. What is proposed is a new way of reading the relationship of contemporary popular music to processes of cultural, political and social change - and a new understanding of how fundamental turbo-folk is to the recent history of former Yugoslavia and its successor states.

In this volume you will find stories about One-eyed, Seven Horned Monsters that double as mothers-in-law, as well as Tricksters, Illusionists, Shape-shifters, Ogres and even the Origin of the Meaning of Fate itself. The Uyghur people have origins that are as ancient as the Han Chinese, if not older. Originating in central China, they were slowly pushed further west until they settled in the Tarim Basin. But the Uyghurs are not just limited to East Turkestan and can also be found inhabiting the Central Asian countries of Kazakhstan, Kyrgyzstan, and Uzbekistan. Smaller communities can also be found in Mongolia, Pakistan, Afghanistan and Russia. Because they have travelled so far and have encountered so many different cultures, it is therefore not surprising that Uyghur Folk-Lore is extensive, which when woven together in such a volume, results in a rich tapestry that can only be pleasing for the reader. We invite you to curl up with this volume and indulge yourself in the fifty-nine tales and stories that stretch back in time, almost to the great flood itself. The Uyghurs are an ethnic minority, who like the Tibetans, have been fighting for their independence for generations. A percentage of the sales from this

In this book, Stephanie J. Shaw brings a new understanding to one of the great documents of American and black history. While most scholarly discussions of The Souls of Black Folk focus on the veils, the color line, double consciousness, or Booker T. Washington, Shaw reads Du Bois' book as a profoundly nuanced interpretation of the souls of black Americans at the turn of the twentieth century. Demonstrating the importance of the work as a sociohistorical study of black life in America through the turn of the twentieth century and offering new ways of thinking about many of the topics introduced in Souls, Shaw charts Du Bois' successful appropriation of Hegelian idealism in order to add America, the nineteenth century, and black people to the historical narrative in Hegel's philosophy of history. Shaw adopts Du Bois' point of view to delve into the social, cultural, political, and intellectual milieus that helped to create The Souls of Black Folk.

**Folk Tale Reader 3**

Wiggling a pencil so that it looks like it is made of rubber, "stealing" your niece's nose, and listening for the sounds of the ocean in a conch shell—these are examples of folk illusions, youthful play forms that trade on perceptual oddities. In this groundbreaking study, K. Brandon Barker and Clairborne Rice argue that these easily overlooked instances of children's folklore offer an important avenue for studying perception and cognition in the contexts of social and embodied development. Folk illusions are traditionalized verbal and/or physical actions that are performed with the intention of creating a phantasm for one or more participants. Using a cross-disciplinary approach that combines the ethnographic methods of folklore with the empirical data of neuroscience, cognitive science, and psychology, Barker and Rice catalogue over eighty discrete folk illusions while exploring the complexities of embodied perception. Taken together as a genre of folklore, folk illusions show that people, starting from a young age, possess an awareness of the illusory tendencies of perceptual processes as well as an awareness that the distinctions between illusion and reality are always communally formed.
