Sexual Identities and the Media encourages students to examine media as a site of negotiation for how people make sense of their own and others' sexual identities. It argues for a critical approach to media that acknowledges the ways in which media representations of GLBTQ bodies are shaped by dominant discourses and how these representations are co-opted by the mainstream culture industry.

Zombies have been portrayed in films and television series as mindless, shuffling monsters. In recent years, this has changed dramatically. The undead are fast and ferocious in 28 Days Later… (2002) and World War Z (2013). In Warm Bodies (2013) and In the Flesh (2013-2015), they are thoughtful, sensitive and capable of empathy. These sometimes radically different depictions of the undead (and the still living) suggest critical inquiries: What does it mean to be human? What makes a monster? Who survives the zombie apocalypse, and why? Focusing on classic and current movies and TV shows, the author reveals how the once-subversive modern zombie, now more popular than ever, has been incorporated into mainstream discourse.

Taking a critical/cultural approach, Wendy Hilton-Morrow and Kathleen Battles weave together theory, synthesis of existing research, and original analysis of contemporary media representations of GLBTQ bodies as sites of non-normative desires and gender identities. Featuring an enormous range of discussion questions and case studies—from celebrity coming-out narratives, transgender models, and slash fiction writers to Glee and Modern Family—this textbook offers a timely, informative, and demystifying introduction to this vital intersection in contemporary culture.

Sexual identities are not just determined by biology. They are also shaped by our experiences and the society we live in. This is because sexual orientation is a complex factor that involves biological, psychological, and social elements.
